kermena izveide

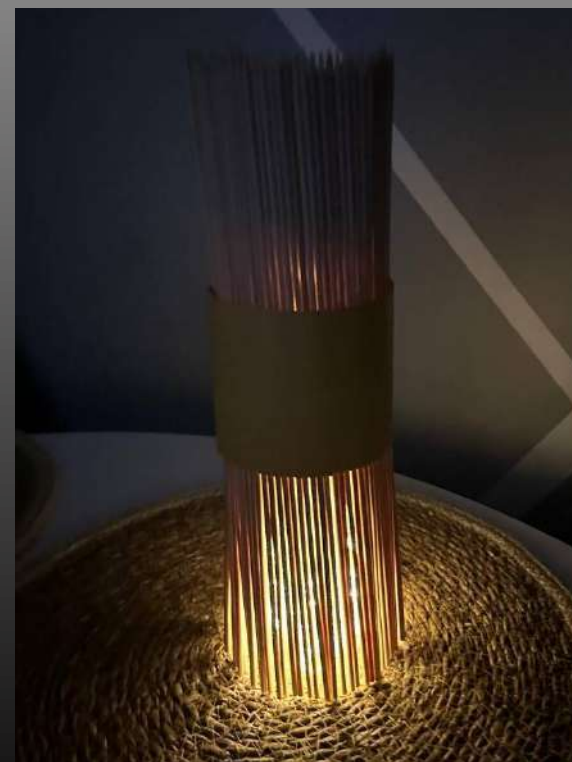

Pirmkārt būtu lampiņu virtenes pie lapenes griestiem, šis jau radīs omulīgu sajūtu. Tad dažus metrus nost no lapenes būtu tādi prožektorī kuriem priekšā būtu melni kartoni kuros būtu izgriezti lapu raksti, kas parādītos uz lapenes sienām. Būtu arī galvenā gaisma kas apgaismotu galdu. Šādi lapene izskatītos ļoti omulīgi un mīlīgi, turklāt vēl papildus dārza sajūtu veidos lapu raksti. :)
