Mamma Inga, pavada savu meitu līdz durvīm. Meita dodas uz skolu. Viņai līdzī ir atslegas ar GPS un SOS pogu, viņa jūtas drošībā.

Meita ir atbraukusi ar riteni uz skolu, drošībā.

Mamma ieet aplikācijā lai noskaidrotu vai viņas meita drošībā ir tikusi līdz skolai, un aplikācija uzrāda ka meita ir skolā. Tagad māte var turpināt ikdienas darbus.

Meita ir skolā, un citīgi mācās. Nevar agaidit kad beigusies skola un ar riteni varēs doties mājās. Viņas atslegas un gps paliek neizmantots.

Škola ir beigusies un meita laimīga brauc mājās. Taču atgadās nelaimes gadījums. Viņa nogāžas uz ceļā, ritenis ir saplīsis un paitet vairs nevar. Ir iespēja nospiezt sos pogu un meitene to dara.

Momentāli mātes mobilajā ierīcē atrāk pazīnojums, ka ir atgadījies kaut kas un lūdzama palīdzība, aplikācija nosūta meitas atrašanās vietu.

Māte ir joti uztraukusies , taču ir sajūsmīnāta par to ka aplikācija spēja tik ātri reaģēt ja notiks kas sliks.

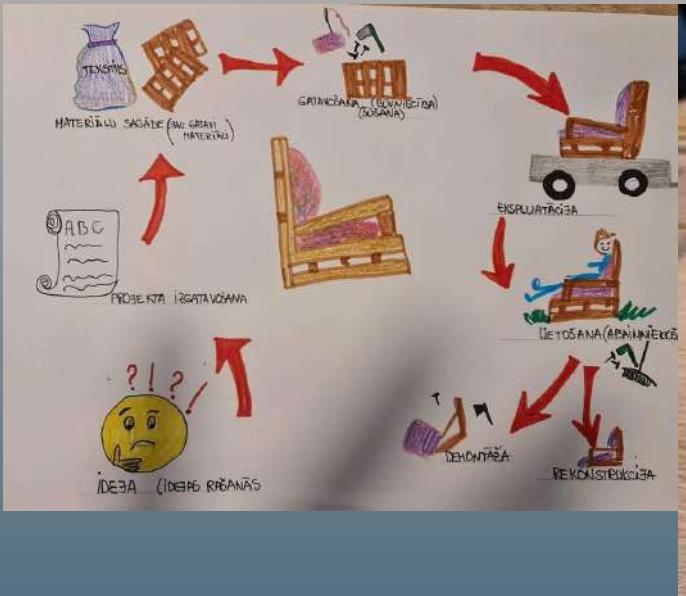

Māte ir sasniegusi norādito lokācijas punktu un spēj palīdzēt savai ievainotai meitai.

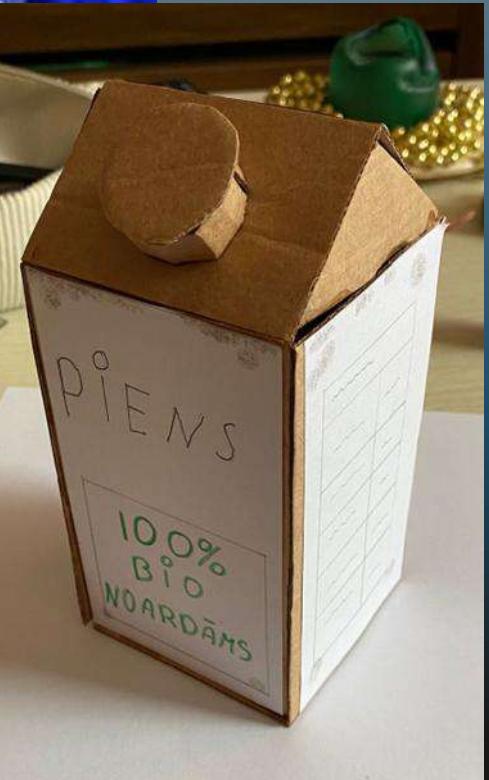

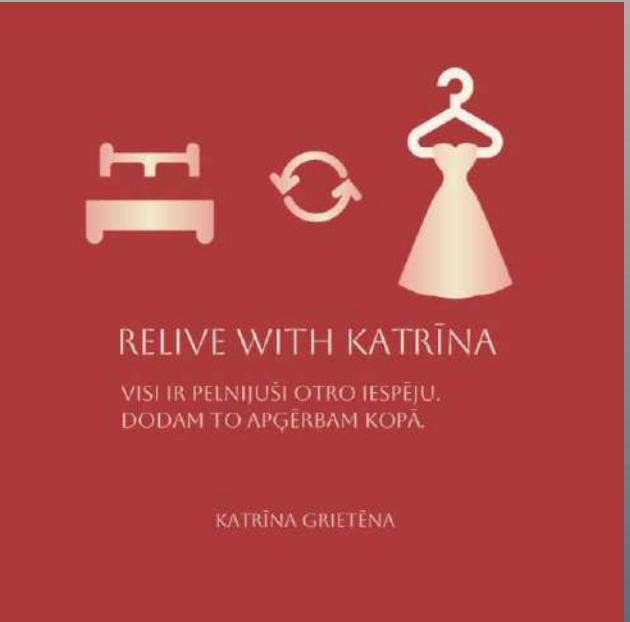

Abas ir pārbraukušas mājās, un runā ka turpinās lietot šo mazo piekarīnu drošības pēc.
